# ABOUT THE PROJECT

The POST-MEET project "Information actions for posting in the construction sector" is a collaborative initiative aimed at improving access to essential information on transnational posting in the construction sector for workers and companies across 8 EU Member States.

It focuses on providing clear and comprehensive information on applicable conditions of employment and procedures, also regarding sectoral funds, through multilanguage guides, in-presence and online seminars, and by innovating communication tools project partners use with posted workers and their employers.

By empowering workers, enhancing transparency, and fostering collaboration among stakeholders, the project contributes to fair and transparent working conditions in the construction sector.

The project is co-funded by the European Union and the European Social fund plus.
